KEYS

All keys are constructed of heavy, rugged material. Each key is identified with a combination number and a specified designation.

LOCK CYLINDERS

The lock assemblies utilize a seven-pin tumbler design made of the finest stainless steel and brass materials. They're precision machined for a long lasting and wearing lock assembly.

ACCESSORY EQUIPMENT INCLUDES:

- Auxiliary Switches
- Mounting Bolts
- Sealing Wires
- Lock Covers
- Wide Range of Bolt Lengths
- Auxiliary Switch Housing

INTRODUCTION

The safety of personnel and equipment is of concern to everyone. Square D offers a complete line of key interlocks to accommodate any interlock system requirement. Backed by the integrity of a Company with over 70 years of experience in the electrical equipment business, Square D's complete line of key interlocks can provide a welcome answer to industry's demand for safe, reliable locking devices.

APPLICATIONS

Square D key interlocks can be used anywhere there are sliding, latching or detachable members of a device whose motion needs to be controlled in a sequential manner. They can be easily mounted in any position.

CONSTRUCTION

Square D key interlocks feature a cast aluminum alloy outer housing containing a special key and lock combination which cannot be duplicated by other sources of supply. The special tumbler design is constructed of the finest materials which insures a long life of use.

DIMENSIONALLY INTERCHANGEABLE WITH OTHER KEY INTERLOCKS

Square D key interlocks are dimensionally interchangeable with competitive interlocking devices which makes lock substitution quick and easy. Also, the lock-cylinder on Square D interlocks can be removed from the front, thus eliminating the need to dismantle interlocked equipment, either partially or completely, to extend or expand an existing scheme.

COMPUTERIZED RECORDS

Computerized record keeping of all interlock orders insures the user of complete system interlock integrity. It also provides for future key/lock cylinder replacement or change, should the need arise.

FAST SHIPMENT

All requests for locks are handled in a fast and professional manner. Shipment can normally be made within two weeks after an order is received.
