PLUG-IN NORPAK LOGIC

NOR Packs	CLASS 8854 PLUG-IN NORPAK DEVICES	Type	Price
10 Standard NORs, 3 inputs, fanout 5 units		SL-1	\$130.
NOR 8 PACK — 4 three Input NORs with direct base connections and 4 Four Input NORs		SL-2	125.
8 Standard NORs, 4 inputs, fanout 5 units		SL-41	100.
8 Standard NORs, 3 inputs plus direct base input, fanout 5 units		SL-42	100.
10 Power NORs, 3 inputs, fanout 10 units		SL-35	140.
8 Power Amplifiers, 3 inputs, can be used as a 250 ma, 20 volt dc amplifier or as a power NOR with fanout to 150 units		SL-5	260.

Counters and Shift Registers	CLASS 8854 PLUG-IN NORPAK DEVICES	Type	Price
0-15 Binary or 0-9 BCD Counter, Unidirectional, 4 bit 1-2-4-8 code		SL-6	\$180.
0-9 BCD Bidirectional Counter Pack, 4 bit, 1-2-4-8 code includes decoding/driving circuitry for SR-4 readout tube		SL-11	320.
Shift Register, 1 bit, 5 zone		SL-9	180.

	CLASS 8854 PLUG-IN NORPAK DEVICES	Type	Price
Time Delay 2 Pack (two timers adjustable in range .1 to 300 sec.)		SL-7	\$320.
Single Shot 4 Pack, four circuits with adjustable output pulses		SL-8	280.
Pulse Element 10 Pack, ten trail edge gated pulse circuits for use with direct base inputs of SL-42 or SL-2 NORs		SL-21	120.
Transfer Memory 6 Pack, five dual pulse elements and flip-flop NOR memories		SL-10	180.
Annunciator 2 Pack, two circuits for monitoring N.O. or N.C. contacts		SL-20	340.
Retentive Memory Adder 5 Pack, five magnetically held reed relay circuits for use with flip-flop memories, counters or shift registers		SL-4	380.
OR Diode 20 Pack, twenty single input isolated diodes		SL-3	110.
Sealed AND 4 Pack, four 4 input AND functions each with sealed memory provision on 3 inputs. Complementary outputs have 10 units fanout.		SL-19	180.
AND 8 Pack, eight 4 input AND functions each having 10 units fanout		SL-39	170.
Flip-Flop MEMORY 6 Pack, six memory functions with common off-return			
Each memory has 2 set and 2 reset inputs and complementary outputs with 10 units fanout		SL-40	160.

	CLASS 8854 PLUG-IN NORPAK DEVICES	Type	Price
Extender Pack — Provides access to logic module socket connections from front side of module mounting rack for test purposes		SL-16	\$120.
Miscellaneous Component Pack — Provides 20 pairs of terminals on circuit board for mounting resistors, capacitor, etc.		SL-31	100.
Interconnection Pack — Provides 40 six foot leads of 20 gauge wire for "off-frame" wiring		SL-32	170.
Flat Cable Interconnection Pack without ribbon cables. Use with maximum of 4 Type SR-19-X ribbon cables for connections between logic frames, to I/O housing or to other "off-frame" accessories		SL-37	130.

SOCKETS AND FRAMES

The use of sockets permits plug-in logic packs to be installed and removed without disturbing wiring. The Square D exclusive socket surround provides large letter and number identification of the pins for ease of wiring. A large marking area is available for identification, and keying pin locations are provided.

Each frame accepts up to 16 sockets. They are of swing out construction to provide access to the back plane wiring. Two configurations are available for panel mounting, and for rack mounting in standard EIA 19" wide racks. Frames can be stacked up to 8 units high.

Class 8854 Type SR
Logic Frame and Socket Assembly

Racks	Class 8854	Type	Price
Logic Module Frame — Hinged, 19" Width, Holds 16 Sockets			
..... for Rack Mounting		SR-9	\$60.
Logic Module Frame — Hinged, 19" Width, Holds 16 Sockets			
..... for Panel Mounting		SR-10	100.
Socket Assembly for WIRE-WRAP* or TERM-POINT wiring		SR-1	26.
With optional interlock contact which opens upon removal of plug-in pack			
..... for end socket positions (2 req'd. for each frame)		SR-26	40.
..... for between sockets (max. 14 req'd. for each frame)		SR-25	40.
Keying Pins for SR-1, SR-26 or SR-26 Sockets (pack of 50)		SR-8	20.

* WIRE-WRAP is a registered trademark of Gardner-Denver Company.
