25-400 KVAR
2400 & 4160 Volts
3 Phase, 60 Hz
Indoor/Outdoor

Type HWP Industrial Power Capacitors

WEMCOL Dielectric Fluid

HWP Capacitor Unit with CLC Fuses

Single Unit HWP Equipment

Two-Unit HWP Equipment

Description

The Westinghouse Type HWP industrial power factor correction capacitor equipments are three phase, 60 Hz., 2400 and 4160 volt ratings, 25 through 400 KVAR assemblies, dustproof and weatherproof. The HWP equivalents (style series 6002C14) consist of one or more HWP capacitor units (style series 1N03300), CLC bushing-mounted fuses (3 per capacitor), a bushing enclosure, and cover.

Standards

Type HWP capacitors meet or exceed all applicable requirements of NEMA and ANSI/IEEE for high voltage power capacitors.

Specifications

Capacitor units — consists of individually-wound sections of low-loss polypropylene film and aluminum foil; dielectric fluid is Westinghouse WEMCOL non-PCB and is completely bio-degradable and does not bio-accumulate. WEMCOL is an OSHA Class IIIB combustible fluid (For further information on WEMCOL, refer to TD 39-212). Each HWP three phase capacitor unit is provided with internal discharge resistors connected between the terminals to reduce the residual voltage to 50 volts or less within five minutes of deenergization. The capacitor case is ANSI 70 light gray painted 409 stainless steel with all joints welded. The HWP capacitor unit is used in HWP complete assemblies for indoor and outdoor applications in ambient temperature range of -40°C to $+46^{\circ}\text{C}$. Each HWP three phase capacitor has 3 ANSI 70 light gray porcelain bushings, gland-sealed to the capacitor cover.

Fuses — Each three phase capacitor equipment is provided with CLC current limiting fuses, 3 per capacitor. CLC fuses are full range current-limiting with an interrupting rating of 35,000 amps at 2400 volts and 60,000 amps at 4160 volts. CLC fuses have a $\frac{1}{2}$ inch $\times$ 13 threaded stud for customer connection.

Enclosure — Three phase HWP capacitor equipments are provided with an ANSI 70 light gray painted steel termination box and gasketed bolt-on cover.

Testing — Westinghouse HWP capacitors meet or exceed all applicable NEMA CP-1 and ANSI/IEEE-18 design and production test requirements for high voltage capacitors.

• HWP capacitor equipments (6002C14) are supplied with 3 fuses **per** capacitor.

• For CLC fuse prices, refer to Price List PL 39-230.

For further information, refer to PL 39-210.
